THE MOVEMENT OF THE INDEXES

HEADLINE CPI

The headline CPI shows an increase of 1.8 percent in the December quarter 2016, compared with an increase of 1.7 percent in the September quarter 2016.

The headline CPI also shows an annual change of 6.6 percent increase from December quarter 2015 to December quarter 2016.

The quarterly percentage changes in the All CPI Towns are:

Port Moresby	1.8 %
Lae	2.0 %
Goroka-Mt Hagen-Madang	2.0 %
Alotau-Kimbe-Rabaul	1.4 %

The percentage changes in the CPI by major expenditure groups from previous quarter are:

Food and non-alcoholic beverages	0.8
Alcoholic beverages, tobacco and betelnut	5.8
Clothing and foot wear	0.2
Housing	2.6
Household equipment	3.0
Transport	1.5
Communication	0.0
Health	0.6
Recreation	0.6
Education	0.0
Restaurants and hotels	-0.9
Miscellaneous	0.2

Graph 1. Quarterly percentage change in the All CPI Towns.

The graph shows Lae and Goroka-Mt Hagen-Madang displayed the highest indexes of 2.0 percent while Alotau-Kimbe-Rabaul had the lowest index of 1.4 percent in the December quarter 2016.

THE MOVEMENT OF THE INDEXES *continued*

UNDERLYING CPI

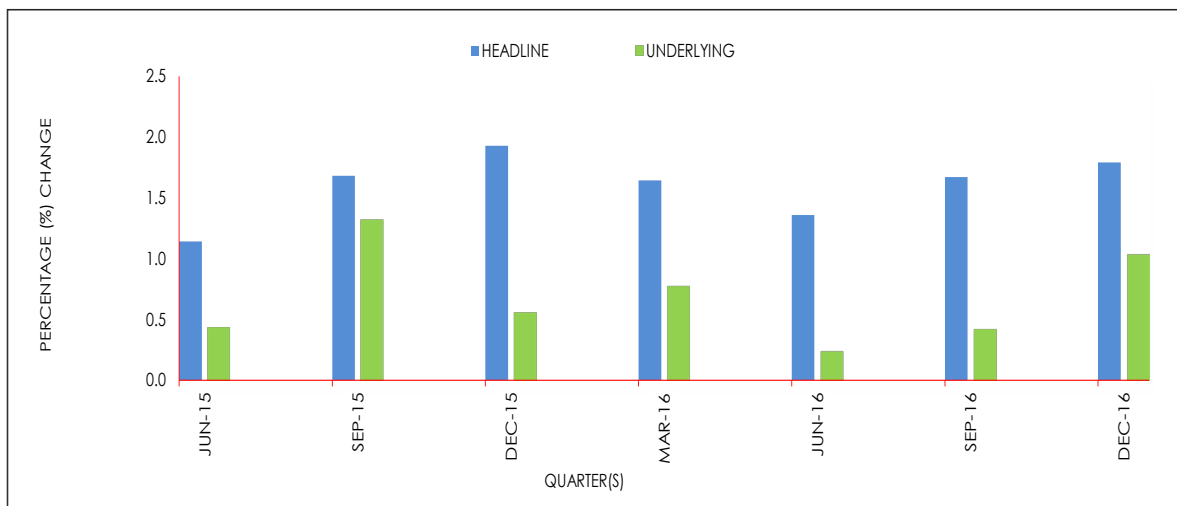

The underlying CPI shows an increase of 1.0 percent in the December quarter 2016, compared with an increase of 0.4 percent in the September quarter 2016.

The underlying CPI also shows an annual change of 2.5 percent increase from December quarter 2015 to December quarter 2016.

The quarterly underlying CPI excluding the three based measures stated below are:

CPI ex- seasonal	1.0 %
CPI ex- seasonal and excise	1.1 %
CPI ex- seasonal, excise and price control	0.9 %

Graph 2. Quarterly percentage change in the Headline and Underlying CPI.

The graph shows the quarterly headline and underlying changes recorded since June quarter 2015 to December quarter 2016.

ANALYSIS AND COMMENTS

MAIN CONTRIBUTIONS TO CHANGE

Graph 3. Quarterly percentage change in CPI Groups, Weighted Average of Eight CPI Towns, September 2016 - December 2016.

Below are the reasons for the increase in the December quarter 2016 CPI. (see Tables 4, 6 and 7).

Alcoholic Beverages, Tobacco and Betelnut (5.8%)

The Alcoholic Beverages, Tobacco and Betelnut group increased by 5.8 percent in the December quarter. This was mainly due to increases in the Betelnut and Mustard subgroup (9.6%), as shown by Betelnut and Mustard (9.6%).

The Alcoholic Beverages, Tobacco and Betelnut group recorded increases in all CPI towns. The largest movements were recorded in Lae (6.4%), Goroka-Mt Hagen-Madang (5.8%) and Port Moresby (5.6%).

For the through year figures (*December Qtr. 2015 to December Qtr. 2016*), the Alcoholic Beverages, Tobacco and Betelnut group increased by 30.4 percent.

Household Equipment (3.0%)

The increase in the Household Equipment group to 3.0 percent in the December quarter was mainly attributable to price increases of items in the Household Maintenance Goods (4.3%) Household Appliances (0.8%) and Household Furniture and Furnishngs subgroups. Price increases were shown in refrigerators (4.3%), washing machines (2.8%) and kerosene stoves (1.7%).

The Household Equipment group increased in all CPI towns, with the main changes shown in Alotau-Kimbe-Rabaul (4.8%) and Port Moresby (2.8%).

For the through year figures (*December Qtr. 2015 to December Qtr. 2016*), the Household Equipment group increased by 5.6 percent.

ANALYSIS AND COMMENTS *continued*

Housing (2.6%)

The rise in the Housing group to 2.6 percent in the December quarter was mainly due to increase for the Rents subgroup (3.9%), as shown by the rentals (3.9%). The Electricity subgroup (0.0%) was unchanged, as was the Water subgroup (0.0%).

The group recorded rises in all CPI Towns. The largest movements were recorded in Lae (4.3%), then followed by Port Moresby (4.0%) and Alotau-Kimbe-Rabaul (3.5%).

For the through year figures (*December Qtr. 2015 to December Qtr. 2016*), the Housing group increased by 5.1 percent.

Transport (1.5%)

The Transport group increased by 1.5 percent in the December quarter. Prices increased mainly in petrol (6.0%) and diesel (5.3%) in the fuels and lubricants subgroup (5.0%).

The Transport group increased in all CPI towns. The highest indexes were registered in Lae (1.7%), Goroka-Mt Hagen-Madang (1.6%) and Port Moresby (1.4%).

For the through year figures (*December Qtr. 2015 to December Qtr. 2016*), the Transport group increased by 3.1 percent.

Food and Non-Alcoholic Beverages (0.8%)

The Food and Non-Alcoholic Beverages group advanced 0.8 percent in the December quarter. This rise in the index was an effect of increases in the Meat (1.3%), Sugars and Confectionery (1.3%), cereals (0.9%) and fish (0.9%) subgroups.

The Food and Non-Alcoholic Beverages group increased in all CPI towns, with the highest indexes recorded in Goroka-Mt Hagen-Madang (1.6%), Alotau-Kimbe-Rabaul (0.6%) and Port Moresby (0.5%).

For the through year figures (*December Qtr. 2015 to December Qtr. 2016*), the Food and Non-Alcoholic Beverages group increased by 2.8 percent.

At the All groups' level, the Consumer Price Index (CPI) increased in all CPI towns during the December quarter 2016.

QUARTERLY SUMMARY

Alcoholic Beverages, Tobacco and Betel nut

The alcoholic beverages, tobacco and betel nut index increased in December quarter. The costs of betel nut and mustard accounted for most of its group increases.

The alcoholic beverages, tobacco and betel nut index increased over the last twelve months. The indexes for tobacco and betel nut and mustard increased.

Housing

The housing index increased in December quarter. The costs of rentals contributed the most to the increase in the rent index. The kerosene index also increased.

The housing index increased over the last twelve months.

Transport

The Transport index increased in the December quarter. This was mainly due to increases in the indexes for petrol , diesel, engine oil and car batteries. Motor vehicle purchases indexes also increased while indexes for Motor Vehicle Registration and Insurance were unchanged.

Over the twelve months to the December quarter, the group index increased.

Explanatory Notes

1. The Consumer Price Index (CPI) measures change in the price of goods and services that represent the spending pattern of urban dwellers in Papua New Guinea.
2. Since the production of CPI by National Statistical Office (NSO) began in PNG, three CPI series have been produced.
3. The Retail Price Index (RPI) was the first series of Index used as measures of the changes in prices of goods and services in PNG. The weightings of the RPI basket were based on the estimates from the household expenditure survey conducted in 1961/62. The RPI was in use from September Quarter 1961 to June quarter 1973 and covered only expatriate households in the urban areas.
4. The second series of the Index was the CPI that covered the public servant's households in PNG. Its weights were based on an Urban Expenditure Survey conducted by the Department of Labour in 1970 and 1971. This series was in use from March quarter 1971 to December quarter 1978. More detailed information on this series are contained in the December 1978 issue of the CPI.
5. The third published Index by the National Statistical Office was known as the cost of living indexes. The weightings were based on the results of survey of PNG wage earners households in the urban areas conducted in 1975/76. This series was in use since December quarter 1975 to December quarter 2013.
6. The current series of Consumer Price Index is based on the 2009/10 Household Income and Expenditure Survey (HIES) and measures quarterly change in the prices of a "basket" of goods and services which account for a high proportion of expenditures by town households in Papua New Guinea. This basket constitutes a wide range of goods and services grouped into the following twelve groups: food and alcoholic beverages; alcoholic drinks, tobacco and betelnut; clothing and footwear; housing; household equipment; transport; communication; health; recreation; education; restaurant and hotels; and miscellaneous. These twelve groups were selected using the COICOP structure (International Classification of Individual Consumption according to Purpose). Each group was then divided into sub-groups and expenditure class.
7. From the information collected in the Household Income and Expenditure Survey (HIES), list of items (also known as regimen) were drawn..... etc.
8. The current indexes are fixed-weighted index using the relative prices multiplied by 100. The relative price for an item is the ratio of its price in a given period to its average price in the base year.
9. Base period refers to a given year in which weights and the items in the selected basket of goods and services in the CPI were adjusted. That is the price level for the selected items in a given period which are compared to those in the base period. For instance, the price of the basket increased by 10% since the base year would show the index value of 110%. Similarly, a decline by 10% represents the index level of 90.
10. From the information collected in the household income and Expenditure Survey (HIES), list of items (also known as the 'regimen') were drawn. The regimen is used in compilation of the index. The prices of the regimen are collected from a total of 300 specifications, which represented 141 expenditure classes. These items were further divided into groups, subgroups and expenditure classes as shown below:
 - (a) Food and non-alcoholic beverages: cereals; meat and fish; fruits and vegetables; dairy products; eggs; cheese; oil and fats; sugar and confectionery; other products and non-alcoholic beverages.
 - (b) Alcoholic beverages, tobacco and betel nut and mustard: alcoholic beverages; tobacco; betelnut and mustard.
 - (c) Clothing and footwear: clothing, men's wear; women and girl's wear; boy's wear; headgear; sewing items and footwear

Explanatory Notes - *continued*

- (d) Housing: rents; housing maintenance; electricity; water and cooking (such as gas, firewood and kerosene).
 - (e) Household equipment: household furniture and furnishings; household appliances and household maintenance goods.
 - (f) Transport: motor vehicle purchases (motor vehicle, motor bike and outboard motor); operation of transport (tyres and batteries); fares (bus fares, PMV fares, taxi fares, local fares, air fares and car hires); fuels and lubricants (diesel, petrol, engine oils) and other services (motor vehicle registration and insurance).
 - (g) Communications: postal services (postal services and mailbox fees); telephone services fixed line rate and prepaid); telephone equipment (mobile phone handset and sim card) and other communication services (internet).
 - (h) Health: medical services (medical fees) and medical supplies, antibiotic drugs and pain killer tablets).
 - (i) Recreation: recreation (DVD player, television, digital camera, batteries, flash drive, biros, bicycle, magazine, newspaper, sports gate and movie fees and photograph).
 - (j) Education: education fees (primary school, secondary school and tertiary school) and other education expenses such as uniform, text book and boarding fees.
 - (k) Restaurant and Hotels: accommodation (hotel accommodation) and takeaway foods (pie, fish and sausage flour, chicken and chips, and rice and beef stew).
 - (l) Miscellaneous: other goods and services such as toiletries and personal care, baby oil and powder, insect repellent, children's toys, barber fees and court fees.
11. In calculating the index, the relative price of each item or group of items is multiplied by a factor (or weight) that reflects the importance of the item or group in relation to the household covered in the CPI. The factor including the groups, sub-groups and specific items are contained in Revised Technical Note No. 3 published by the NSO.
- This technical Note also provides information on the system of weighting used to derive differences in expenditure pattern between the different CPI towns.
12. Revised Technical Note. 4 provides description of methods used in the price collection and the compilation of the index. Copies of this Revised Technical Note. 4 and also 3 can be obtained from the National Statistical Office by contacting the Statistical Information Officer on telephone: 325 0244 or 325 0255.
13. Table 2, 4, 6, 10 and 12 shows percentage change in the index for all groups by both quarter and year. This enables the users to make direct comparison between various quarters and from year to year. The movement in the index from one period to another is usually expressed as percentage change rather than as differences in index value (or index point), because the level of the index relative to the base period affects the index point

Explanatory Notes - *continued*

14. Table 7 and 8 shows the contributions to the total CPI.

INDEX POINTS AND PERCENTAGE CHANGE

15. Movement in index for one period to another can be expressed as a percentage change or changes in index points. The differences between the two approaches to describe movements in indexes is shown by the following example:

All groups CPI: Weighted average of all town index numbers:

March Quarter 2013	104.0
Less December Quarter	102.3
Change in index points	1.7

16. The index number 104.0 for March Quarter 2013 indicates an increase of 4.0 % since the reference base period is June Quarter 2012.

The percentage change in an index between any two periods is calculated by subtracted the index value for the earlier period from the later period, and dividing the result by the value for the earlier period, and then multiplied by 100.

17. Percentage change from December quarter 2012 to March quarter 2013

$$= 1.7/102.3 \times 100 = 1.662$$

18. The percentage changes in the index shown in this bulletin are calculated from unrounded values expressed in three decimal places.
19. The contribution of any group, sub-group or expenditure class to the change in an overall index is calculated by multiplying the change in the index for the group, sub-group or expenditure class item by its percentage weight in the overall index and dividing the result by 100.
20. The table 11 shows the index numbers for headline and the underlying measures while table 12 shows its percentage change.
21. The explanatory notes for the two measures of inflation; underlying and headline measures are highlighted below.
22. Table 13 has been created showing quarterly average prices for all items for the eight CPI towns.
23. The index numbers and the percentage changes for the goods and the services components in table 8 have been separated from the total CPI.

SYMBOLS USED

24. The following symbols have been used throughout this bulletin

-	:	nil or less than half of the digit shown
na	:	not available

Note: Differences between published totals and actual sums of components are due to rounding technique used.

Explanatory Notes - *continued*

RANGE OF INFORMATION AVAILABLE

25. Users are advised that a range of price indexes and the weighted town average index for all expenditure groups are available. There are separate indexes for each of the eight towns and the expenditure groups are also available. A detailed indexes and average price information can be made available on request.

UNDERLYING INFLATION

26. The CPI measures price changes across a range of goods and services that represent the spending pattern of PNG's town population. Inflation measured by the CPI is called "headline" inflation. The CPI can be highly volatile partly due to climate effects (droughts and floods), seasonal patterns, or government policy decisions such as tax reform. High volatility hampers interpretation of current inflation and forecasting future inflation. In response to this problem, the June quarter 2012 issue of the Consumer Price Index introduced an additional measure of price change called the "underlying rate of inflation".
27. The underlying rate filters out passing movements in inflation while retaining persistent movements. This is more useful than the headline for developing and monitoring monetary policy. A variety of underlying rate measures can be constructed though there is no ideal measure that perfectly satisfies both the needs for forward looking policy making and backward looking measurement of price change. NSO has developed a single measure of price change. NSO has developed a single measure of underlying inflation based on the average of three "exclusion-based" measures.
- i CPI excluding seasonal:
Excludes the CPI item Betel nut and Mustard, and the subgroup Fruit and Vegetables
 - ii CPI excluding seasonal and excise:
Excludes the seasonal items in (i) plus the subgroups affected by changes excise duties – Alcoholic beverages and tobacco.
 - iii CPI excluding seasonal, excise and price control:
Excludes the seasonal and excise affected items and subgroups noted in plus the selected price-regulated category Rents, Electricity, Water, Fares, Fuels and Lubricant, Other Services, Postal Services, Telephone Services, Other Communication Services, Medical Services and Education Fees subgroups.
28. The underlying rate of inflation presented here is the average of these three exclusions based measures.

HOW TO OBTAIN MORE INFORMATION
